

Medium Power Section Stepper Drivers

Maximum output current (per phase): 2 A
Motor supply voltage (VM): 12 ~ 48 V (BOM dependent)
Number of channels: 6
Default state after power-up: disabled
Global POWER_ENABLE signal provided by MainControlBoard
Shared nFAULT signal with common pull-up resistor
Shared nFAULT signal with common pull-up resistor

nSCS : Internal pull-up
ENABLE : Internal pull-up
nSLEEP : Internal pull-down
DIR : Internal pull-down
STEP : Internal pull-down
SPI bus: Shared (SCLK, SDI, SDO)
Chip Select: Dedicated per driver
STEP/DIR: Dedicated per driver
